

TEST LAB COMMENTS

TOSHIBA

e-Studio 2515AC

*What we liked:*

- High-performance machine: good results in terms of productivity, simultaneous scanning and printing; very short RIP time
- Feeder / scan functions among the fastest on the market (up to 240 ipm)
- Large and easy-to-use touch-screen interface. Neat feature for saving the setup of complex jobs (scan, copy) in a single click
- Scan: preview function + thumbnail scrolling allow easy and efficient sorting of documents scanned on the machine
- Busy office test: receiving 15 varied print jobs at once has almost no impact on productivity
- Copy interface is easy to use: 8 strokes for an A4R booklet
- Toner cartridge capacity is very good
- Option in copy and print modes to print onto the back of a (rear) cover page during single-sided printing.
